

Product Information

Asphalt Flux

DESCRIPTION

Asphalt Flux is the final product in crude oil distillation. At Cross Oil we maintain uniform conditions in our vacuum tower, enabling the production of consistent Asphalt Flux. Since our crudes are continuously blended for exact composition, Cross Asphalt Flux exhibits a high degree of uniformity in penetration, softening point and viscosity. This means that top quality products can be made from this key ingredient with greater ease and lower over-all expense.

TEST NAME	TEST METHOD	SPECIFICATIONS		
		Minimum	Maximum	Typical
Gravity, API	D-4052	-	-	7.5
Softening Point, °C	D-36	49	-	52
°F		120	-	126
Sulfur, wt. %	D-4294	Report	Report	2.4
Penetration	D-5	-	30	20
Flash, °C	D-92	-	-	271+
°F		-	-	520+
